

Name(s): _____

Genetic Disease Presentation!

Be sure to **include** the following:

- The name of the condition
- What causes it?
 - Is it sex-linked, dominant, recessive
 - Is it a defective gene, or a chromosome abnormality
- Symptoms
- What type of doctor would treat it
- Medication
- How many people are affected per year
- How many deaths per year
- What does it require to live with this disease

You will be using *Microsoft PowerPoint, Google Docs, or Keynote* on the iPad to make your presentation. Make your presentation **exciting!** Use lots of **pictures/animations**. Don't overload your slides with text. The slides are only an outline...**do not** plan on reading directly off of your slides! Your presentation should last approximately **5-7 minutes**.

You will be graded on the following:

_____/4 PowerPoint Creativity

_____/4 Presentation Professionalism

_____/4 Required Information

_____/4 Length of Presentation
